

SPECIFICATIONS

Decoustics Specifications are custom tailored to project and product requirements and are available by completing a request on line, or by contacting Decoustics or your local Representative.

ACOUSTICAL TEST DATA

All acoustic tests are performed at accredited independent testing laboratories.

Copies of Laboratory Reports are available; many with 1/3 octave band data.

Mounting types are as follows: Type F5: panels mounted with 5mm (3/16") bracket clip - wall or ceiling (direct mount). Type E 400 represents panels mounted 400mm (16") from substrate (suspended ceiling panels).

FIRE TESTING

All fire tests are performed at accredited independent testing laboratories.

Laboratory Reports are available for composite products passing U.S. and select European Standards.
